# IN-BATH BATHING CRADLE

Designed to assist

The In-Bath Bathing Cradle has been designed for use in the bath to make bathing, washing and providing personal care easy. The cradle is hoist-able for patient transfers into a bath. The bathing cradle will support a patient in a reclined position allowing greater immersion in the water. The cradle can also be used on a base transporter.

The mesh fabric is easily removable and features a polygiene antimicrobial coating. The cradle is manufactured using stainless steel, and a quality finish is guaranteed with the polyester powder coating. Four standard sizes available, but if you have a bespoke requirement - contact us. The In-Bath Support is available separately as part of our accessories range.

## TECHNICAL DATA

No specialist cleaning required due to our BacAway anti-bacterial powder coating, just use a proprietary cleaning solution.

The Mesh & Straps are Manufactured From 100% Polyester

Do Not Wash at Temperatures Above 71°C

Do Not Dry Clean
